

ABOUT FLEXXOMAT T

The Flexxomat T disinfectant mat is the preventive hygiene solution for passenger and transport traffic in the food industry, glasshouse horticulture, agriculture and laboratories. Also very suitable for places where many people meet, such as large events, trade fairs and airports. Within the framework of quality management systems such as HACCP, BRC, IFS, GSPP and ISO 22000, risk and high care zones of production companies can be protected even better against the introduction of micro organisms and their possible consequences. The Flexxomat T is unique and can be used for various types of (internal) transport, where the mat, due to its innovative design and reinforcements (patented), does not need to be secured to the subsurface. For effective and disinfectant efficient use, but also for proper cleaning, the Flexxomat T can be equipped with an internal fluid distribution tunnel. The mat can then be connected to a dosing pump via an external hose pipe (for the supply of disinfectants or for cleaning by rinsing with water). Maintaining the level of the disinfectant fluid in the mat is hereby always guaranteed.

Flexxolutions has more than 15 years of experience in the development and production of disinfection mats and offers customer-specific customised solutions in addition to standard sizes.

*Patent2007148

Advantages and unique features of the Flexxomat T

- ✓ Suitable for various types of internal transport
- ✓ Can be filled manually or automatically
- ✓ The liquid absorbent core and the semi-permeable upper deck prevents low evaporation of costly disinfectant
- ✓ By filling automatically, disinfectants are efficiently treated. The function of the mat is guaranteed, no more dry mats
- ✓ The mat is virtually insensitive to curling by internal stabilization plates
- ✓ The mat remains by itself and can be easily moved, no holes in the floor
- ✓ The quality of the Flexxomat is guaranteed by design and production in-house
- ✓ Optionally the disinfection mat can be equipped with internal disinfectant presence to assure availability of disinfectant

About FLEXXOLUTIONS

Flexxolutions has a broad experience in development, producing and assembling innovative textile solutions for covering and storage systems for gases, liquids and solids. The addition of our subscript "Innovators in technical textile products" explains our ultimate strength. This is the innovative design of products and customer-specific engineering, production and installation of covering and storage systems as silo roofs in normal and gas-tight execution, airborne double membrane roofs serving the biogas industry and storage both in the form of pillow tanks liquids as water and high-quality bags for storage of manure, gases and combinations thereof. Besides this range of products we also designed and supply innovative (patented) disinfections mats, flexible solid storage silo's, truckliners and products for temporary refugee camps as collapsible water kits, toilets and showers. All required disciplines in terms of design (Solidworks 3D), tailoring (CNC cutting) and welding (high frequency and thermal) we have in house. Because we have all of these disciplines in house we can make your system in the shortest possible time in relation to quality, design, production and assembly.
