

## Working and stocking conditions for hooks

For optimal use of our hooks, please follow the storage conditions listed below and the general terms of delivery.

### Article 1:

- In case of tomato hooks; The tomato variety and type must be known from the start: inquiry, offer and order.

### Article 2:

- In case of tomato hooks; For the heavier tomato varieties (such as medium-, large vine tomatoes, beef tomatoes and "couer de boeuf" tomatoes) we urgently recommend the 3.3 mm hook.

Description	Tomato variety	Steel thickness	Twine strength
Tomatoes with high plant weight	Merlice, Marinice, Climbo, Maxeza, Trovanzo, Speedella, Progression, Provine, Xaverius, SG 16363, NUN 09321, SG 15533, Tomimanu Muchoo	3,3 mm	1/1000 – 1/1200
Tomatoes with extra high plant weight	Xandor, Maxcize,, Sevance, Radiance, Tomicia, Santiana, Gerdicia, Bountice, Marguerite, Rebelski, Torero, Ducovery	3,3 mm	1/1000

### Article 3:

- When there is a heavy planting load expected we strongly advise using 1/1000 rope. If thinner twine is chosen in relation to the weight of the tomato variety, Royal Brinkman cannot be held liable for any consequential damage.

Type of tomato	1/1000	1/1200	1/1500

**Article 4:**

- When lowering the plant, the personnel must guide the plant weight and remove the hook from the crop wire in a controlled manner. Click [here](#) to watch our video's on how to hang your hooks in the best way.

**Article 5:**

- The excessive use of Sulphur or other chemical products (e.g. chlorine) may affect the quality of the twine.

**Article 6:**

- Always read the instructions method first (for example O-hook) before you start.

**Stocking conditions**

- Stock the boxes in a dry and chill place, preferably between 15-25 degrees.
- Avoid direct exposure to sunlight or heat sources.
- Stock 24 hours in greenhouse conditions before use.
- Do not use the hooks with chemicals such as pesticides, herbicides or sulfur. This may affect the quality of the twine and hooks.
- When using bio hooks. Let the bio hooks acclimate first and use immediately. The bio hooks cannot be stored for months.
- Sprinkling above or fogging in the greenhouse is bad for the quality of the hooks (especially bio hooks)

**If you have any further questions, please contact your account manager.**
